

Following are 4 excerpts from published articles by physicians who recommend Ketotifen for the treatment of Leaky Gut. See yellow highlights for quick reference:

Article excerpt from Dietrich Klinghardt, MD, PhD and Dr. Allison Hoffman (Dr. Klinghardt is the #1 doctor in the world for treatment of mercury toxicity and its related health conditions):

<http://drallisonhofmann.com/wp-content/uploads/2015/11/TownsendLetter-Parasitosis.pdf>

Heavy metal chelation and colon cleansing, and additional antimicrobial support for comorbid infections (viral and bacterial populations may increase during biofilm disruption and immune changes). Ketotifen, useful in decreasing histamine's effects and rebamipide, helpful for mucosal protection and healing, may be employed. In author's experience, individual parasite burden is most certainly proportional to a person's toxic burden. Minimally, the antiparasite treatment should be accompanied by aluminum, lead, and glyphosate detoxification protocols. Glyphosate toxicity likely creates alarval growth advantage in parasitic illness, and heavy metals are well-known components of biofilm communities in general.

A dying parasite will release the stored toxins back into the host if proper support is lacking. Therefore, it is imperative to never give treatment without toxins binders to catch the biological "fallout" of antiparasitic treatment. The authors favorites include ZeoBind (BioPure), G.I. Detox of antiparasitic treatment. The author's favorites include ZeoBind (BioPure), G.I. Detox (Bio-Botanical Research), chlorella (BioPure), clays such as green clay (BioPure), and silica-rich products such as diatomaceous earth and microsilica (BioPure). The addition of weekly, biweekly or even daily colon hydrotherapy sessions cannot be overemphasized.

Replanting the gut with therapeutic amounts of probiotics if often necessary, and the immunological advances of fecal implants warrants their consideration....

Article Excerpt from Dr. Steven J. Harris, MD:

Healing the Gut

It's important for me to support my patients' physiology, to the extent that I am able, by adding the right kind of nutrition to their diets and which is easy for them to tolerate. Many of my patients are gluten and casein sensitive, and have lots of food allergies, so eliminating these allergens from their diets is important.

In order to heal their guts and decrease Leaky Gut syndrome, I may give them substances such as Xymogen's IgG-2000 DF, which are bovine source immunoglobulins that calm the gut down. I may use this in conjunction with a product called Intestimax, which is a combination of marshmallow, butyrate, and glutamine that supports the integrity of the intestinal lining. Or I might give them rectal butyrate, which also calms the gut, or Ketotifen, which reduces

inflammation and promotes healing of the intestine. Sygest, Juvecal and Roqueforti, as well as other spagyric homeopathics from Bioresource are likewise useful for this purpose.

After this, I will start treating their yeast problems. Yeast overgrowth must be controlled in order to fully heal the gut, and I use a broad range of remedies for getting rid of yeast; everything from cellulase to caprylic acid, pau d' arco, and oregano oil, to the pharmaceutical medications.

Article Excerpt from Dr. T. C. Theoharides – *Novel Treatment Approaches to Autism* (LIA Foundation):

http://www.betterhealthguy.com/joomla/?option=com_content&view=article&id=77&Itemid=76&fontstyle=f-larger

Ketotifen is an antihistamine like Benadryl but is also a mild inhibitor of mast cells and of eosinophils. It is different from the way NeuroProtek works. Ketotifen's action (eosinophils) is in addition to NeuroProtek (slows mast cells).

Parasites - not a single good lab in the US. Neurocysticercosis - parasite in the brain. Found in Orthodox Jewish community implying that if they have it, needs to be looked at in everyone. Only dead parasites live in the poop. Living parasites live in the lungs, CNS, and other places in the body.

- It is illegal to ship raw milk across state lines thus not easily available. FDA says you cannot ship raw across state lines. <http://www.realrawmilkfacts.com> has legal issues. <http://www.ghlcom.com> also has information.
- 1/2 cup per day seems to be the minimal dose for adults to see an effect.
